12 June 2024

Dear Parent/Carer

I am writing to inform you of the changes we are making t. We have recently purchased the new 'Century' software package to help students revise for English. This is new Artificial Intelligence technology, in which the students are placed on an independent learning journey to help target gaps and misconceptions in their English knowledge.

Students will be required to complete assignments set by their teacher each week for home learning.  They will be required to use this revision platform in Years 10 and 11 to cement their knowledge of GCSE English; so beginning to use the software now is fantastic preparation for Key Stage 4.

The students will sign up for the software in their English lessons and will be instructed on how to use the package by their English teacher. The tasks they have to complete are called 'nuggets' and will either be set by their teacher or by the 'AI' software that monitors their responses.

The award-winning technology will support student revision, particularly for English, as the GCSE course has a vast amount of content that must be continually revised over the two-year period. The software also works with a parent/carer login, and we will contact you as soon as this function is available.

Please do not hesitate to contact me if you have any further questions about 'Century'.

Yours faithfully

R Johnson
